Procedures by COVID-19 Community Transmission Level
Based on the CDC's Covid monitoring dashboard for healthcare facilities & CMS regulations

DEFINITIONS

"Up-to-date" with COVID-19 vaccinations: You have had 2 Covid Vaccines (if Moderna or Pfizer) or 1 Covid Vaccine (if Johnson & Johnson) AND a Booster; OR You have had 2 Covid Vaccines (if Moderna or Pfizer) or 1 Covid Vaccine (if Johnson & Johnson) and are not yet eligible for a booster.
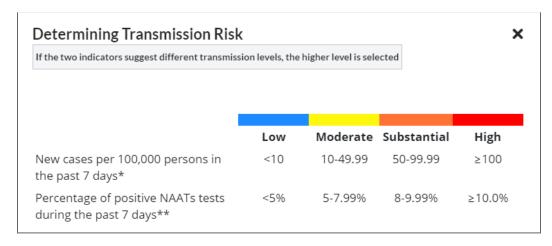

Eligible for a Booster: You are eligible for a booster if it has been 5 months or more since your second Pfizer or Moderna vaccine, or it has been 2 months or more since your J&J vaccine.

Outbreak (as defined by PA DOH): 1 case of suspected or confirmed COVID infection in a resident or team member; OR 1 resident with severe respiratory infection resulting in hospitalization or death; OR 3 or more cases of an acute illness compatible with COVID-19 with onsets within a 72-hour period.

Switching to High/Outbreak level: Scope will be assessed on a case-by-case basis based on details of the outbreak - may be specific to a neighborhood or level of living if it can be contained.

Transitioning between levels:
- When transmission rates are <u>increasing</u> = immediately transition to the higher level of transmission's protocol.
- When transmission rates are <u>decreasing</u> = Cumberland County must stay in the lower level of transmission for 2 consecutive weeks before we can transition to the lower level of transmission's protocol.

How the CDC calculates transmission levels for healthcare facility use:

Determining Transmission Risk

If the two indicators suggest different transmission levels, the higher level is selected

	Low	Moderate	Substantial	High
New cases per 100,000 persons in the past 7 days*	<10	10-49.99	50-99.99	≥100
Percentage of positive NAATs tests during the past 7 days**	<5%	5-7.99%	8-9.99%	≥10.0%

Note: *This calculation is different from guidance for the general community. RL residents and guests may follow general community guidance, but <u>ALL team members, regardless of work location</u>, as well as guests in Village Center, <u>must follow guidance based on transmission levels for healthcare facilities.</u>*

We recommend staying up-to-date with COVID-19 vaccinations.
